

Occupational Therapy Assistant

Associate of Science

The ONLY OTA Program in NH or VT!

Occupational Therapy Assistants (OTA's) help people improve their ability to perform tasks in their daily living and working environments. They work with people to help develop, recover, or maintain daily living and work skills. Occupational therapy assistants help clients not only to improve their basic motor functions and reasoning abilities, but also to compensate for permanent loss of function. Their goal is to help people have independent, productive, and satisfying lives

Our graduates are finding jobs with a great deal of flexibility, good benefits and room for growth. The need for OTA's is growing exponentially.

The associate-degree-level occupational therapy assistant program has applied for Re-Activation of Accreditation by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA).
